# PALLAVI GONEPALLI

Python Full Stack Developer

## PERSONAL DETAILS

**Mobile :** +91 9382060523
**Email :** pallavigonepalli55@gmail.com
**LinkedIn :** https://www.linkedin.com/in/pallavi-gonepalli/
**Github :** https://github.com/Pallavi-Gonepalli

## SUMMARY

I'm a Python Full Stack Developer with around 6 months of experience building web applications across frontend and backend. I've worked on projects like the IndiaAI MSME Agent Mapping Portal and Smart Mutation platform for the AP Government, where I built UIs in React.js and APIs in FastAPI. I enjoy turning complex requirements into clean, functional interfaces and I'm comfortable working across the stack from PostgreSQL schemas to Tailwind-based frontends.

## WORK EXPERIENCE

### UI Developer at Innomax IT Solutions

- Developed responsive and user-friendly UI components for Hop Atlas, a flight booking platform built on PHP, focusing on seamless interface design, cross browser compatibility, and improved user experience.
- Integrated frontend views with PHP backend services on Hop Atlas, ensuring smooth data flow between UI and server-side logic for flight search and booking workflows.
- Built full-stack features during hackathon projects using React and Next.js for frontend, FastAPI (Python) for backend APIs, and MySQL/PostgreSQL for database management.
- Designed and consumed RESTful APIs with FastAPI in hackathon projects, connecting dynamic React/Next.js interfaces with Python backend logic and relational databases.
- Collaborated with cross-functional teams to rapidly prototype and deliver innovative solutions under tight hackathon deadlines, demonstrating strong adaptability and execution speed.

# PROJECTS

### MSME - Intelligent Agent Mapping

- Built a high-performance B2B ecosystem platform (IndiaAI MSME Agent Mapping & Udyami Portal) using React.js, Tailwind CSS, FastAPI, and PostgreSQL, featuring a dynamic dashboard for real-time business intelligence and supply chain visibility.
- Implemented a RAG (Retrieval-Augmented Generation) framework with NIC code analysis to automatically categorize enterprises into Vendors, Clients, Strategic Partners and Competitors, transforming raw MSME registration data into actionable insights.
- Designed a UUID-based relational schema in PostgreSQL and integrated OTP-based secure authentication, supporting end-to-end professional engagements with automated financial tracking for payables and receivables.

### Hop Atlas - Flight Booking Platform

- Developed responsive and interactive UI components for Hop Atlas, a flight booking platform, using React.js, implementing features such as flight search, filters, and booking flows with a focus on clean, user-friendly design.
- Integrated React frontend with PHP backend APIs to enable dynamic data rendering for real-time flight listings, availability checks, and booking confirmations.
- Built and optimized reusable UI components ensuring cross-browser compatibility and mobile responsiveness, improving the overall user experience across devices.

### Smart Mutation - Land & Revenue

- Developed an AI-driven land mutation automation platform for the Andhra Pradesh Lands & Revenue Department, using a smart compliance engine to replace manual verification workflows and significantly reduce turnaround times for Mandal Revenue Officers (MROs).
- Integrated OCR-based document verification and a machine learning fraud detection module to automatically identify property encumbrances and flag suspicious transactions, acting as an intelligent gatekeeper for land records.
- Built a real-time analytics dashboard providing live visibility into mutation requests, approval statuses, and compliance checks, enabling data-driven decision-making for revenue department officials.

---

# EDUCATION

**Bachelor Of Technology In Computer Science And Engineering** 2021-2025
Dhanekula Institute Of Engineering & Technology, Vijayawada
CGPA : 8.8

## TECHNICAL SKILLS

- **Programming Languages :** Python, JavaScript, HTML5, CSS3
- **Frameworks & Libraries :** React.js, Next.js, FastAPI, Node.js, Express.js, Bootstrap, Tailwind CSS
- **Databases :** MySQL, PostgreSQL
- **Tools & Platforms** : GitHub, VS Code, Cursor, Antigravity
- **Computer Fundamentals :** Networking Concepts (OSI Model, TCP/IP, Routing Protocols)
- **Soft Skills :** Problem-Solving, Leadership, Communication, Time Management

---

## CERTIFICATES

- Responsive web design by freeCodeCamp
- SQL basic from HackerRank
- Tech A Web Development using HTML and CSS from InfosysSpringBoard
- MERN stack developer by Codegnan
- Programming Foundations with Python

---

## LANGUAGES

English
Telugu
